	● Carpet	 7871	 7845	 7854

BE-105

Multi-functions : The best choice for customers

- Use fully computerized microprocessor lift controller instead of PLC control panel.
- With variable voltage and variable frequency (VVVF) control system.

Feature of Digital LED Display Panel is the best quality screen that is imported from United Kingdom and digital coding system; smooth, safe and comfortable.

Thoughtful and suitable design provides comfortable space

VM household elevator is fully designed for customers needs. Interior of car uses high-quality colored stainless steel panel or a selection of colour decorative steel panels.

It is smooth and graceful. The heavy-duty acrylic-glass window expands vision & safety.

The walnut wood indicator adds classical taste.

The light is soft and bright. Telephone and handrail... are also available on request to fit customers needs.

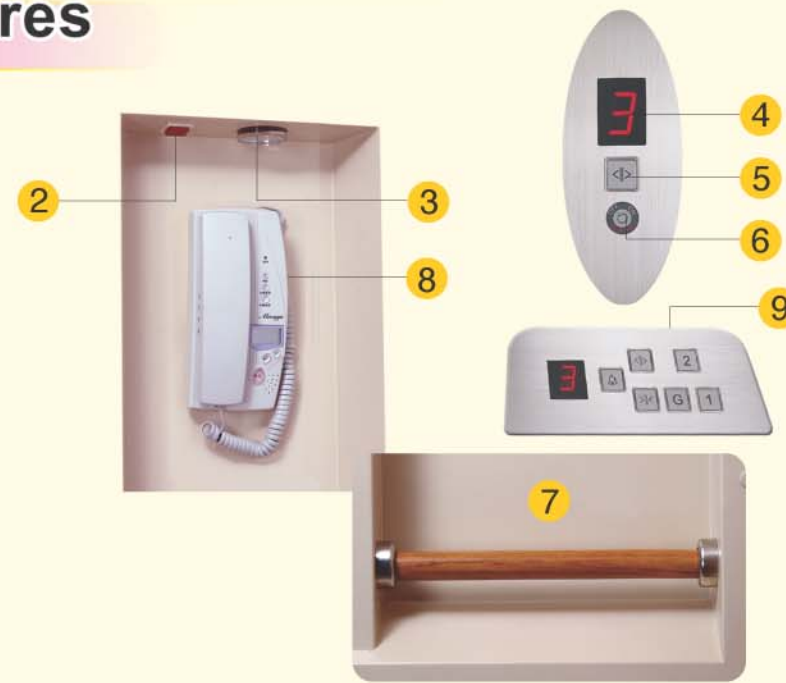

Cabin Features

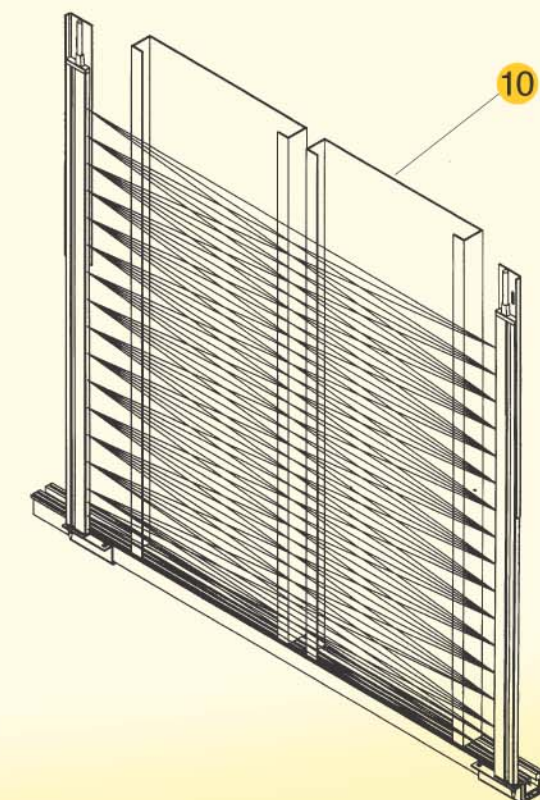

BE-105

HJ-200

- 1 Ceiling: Leisure and stylish look curvature ceiling.
- 2 Emergency stop button: For emergency use to stop the lift.
- 3 Emergency light: The light will automatically on when the power failure.
- 4 LED digital indicator.
- 5 Stainless steel button.

- 9 Car operating panel: With large size panel, it is easy for vision and operation.
- 10 Infra red safety curtain for lifts.

Control System

This control system is a general type frequency and voltage converting power-saving VVVF, using CPU auto control to calculate wider application of any 3-phase sensor motor and single-phase sensor motor, enabling the existing elevator to save energy.

CH-250

FEATURES :

1. Compact, easy to install and test run.
2. Digital speed control, high stability, low trouble rate.
3. Automatic reading memory of floor location, easy to operate.
4. Call is by in-line transmission, saves working time and cables.
5. Using any 3-phase sensor motor.
6. Using single-phase sensor motor.
7. Uses slip frequency vector control.
